Engineering Psychology & Human Performance Christopher D. Wickens, Justin G. Hollands, Simon Banbury, Raja Parasuraman

Forming connections between human performance and design *Engineering Psychology and Human Performance, 4e* examines human-machine interaction. The book is organized directly from the psychological perspective of human information processing. The chapters generally correspond to the flow of information as it is processed by a human being--from the senses, through the brain, to action--rather than from the perspective of system components or engineering design concepts. This book is ideal for a psychology student, engineering student, or actual practitioner in engineering psychology, human performance, and human factors

Learning Goals Upon completing this book, readers should be able to:

- * Identify how human ability contributes to the design of technology.
- * Understand the connections within human information processing and human performance.
- * Challenge the way they think about technology's influence on human performance.
- * show how theoretical advances have been, or might be, applied to improving human-machine interaction
