Google's Very Public IPO Mingsheng Li, Thomas Corr, Victor Fleischer, Anita Anand

Google Inc. (Google) is a California based internet search engine company that was formed in 1998 by Stanford University PhD students Larry Page and Sergey Brin. On April 19, 2004 Google filed Form S-1 Registration Statement (S-1) with the U.S. Securities and Exchange Commission indicating its intent to go public by an Initial Public Offering (IPO) of its shares. In a July 27, 2004 regulatory filing with the SEC, Google announced that it planned to sell the shares using the Dutch auction method. Prior to the IPO, valuations from industry experts and Google itself suggested that the IPO would place a value on Google in a range of \$8.3 billion - \$57 billion. The purpose of this paper is to address the Dutch auction versus Book-building IPO methodologies, the results of the Google IPO, and the effect of the Dutch IPO process on the Google IPO. (Excerpt from paper by Tom Corr published in the book)*****

This Case Study discusses the branding impact of the Google IPO. In a longer, Article-length version of this paper which appears in the Michigan Law Review, I argue that branding is an unappreciated element of contract design. Corporate finance scholars generally assume that consumers focus on product attributes like price, quality, durability, and resale value. But consumers choose brands, not just attributes. The legal infrastructure of deals sometimes affects the brand image of the company. This Case Study explores the link between deal structure and brand image in one specific but noteworthy deal, the Google IPO. It is an extreme example of the branding impact of deal structure, but one that helpfully demonstrates the branding implications that exist, to a lesser degree, in other deals. The primary goal of structuring an IPO is to lower the cost of capital by managing the information asymmetry between the issuer and investors. From this perspective, the success of the Google deal is questionable. Few would call the deal elegant or efficient. But the auction structure allowed Google to do more than raise money. Google also reinforced its image as an innovative, egalitarian, playful, trustworthy company. (excerpt from Victor Fleischer's paper)

From reader reviews:

Mae Saari:

Nowadays reading books be a little more than want or need but also turn into a life style. This reading routine give you lot of advantages. The advantages you got of course the knowledge the particular information inside the book that improve your knowledge and information. The information you get based on what kind of e-book you read, if you want get more knowledge just go with education and learning books but if you want feel happy read one using theme for entertaining such as comic or novel. Typically the Google's Very Public IPO is kind of book which is giving the reader capricious experience.

Karen Wells:

This Google's Very Public IPO is great guide for you because the content and that is full of information for you who always deal with world and have to make decision every minute. This kind of book reveal it info accurately using great organize word or we can say no rambling sentences inside it. So if you are read the item hurriedly you can have whole info in it. Doesn't mean it only gives you straight forward sentences but difficult core information with wonderful delivering sentences. Having Google's Very Public IPO in your hand like finding the world in your arm, information in it is not ridiculous one. We can say that no guide that offer you world within ten or fifteen minute right but this guide already do that. So , this is certainly good reading book. Hi Mr. and Mrs. hectic do you still doubt this?

Gregory Anderson:

You can spend your free time to see this book this book. This Google's Very Public IPO is simple to create you can read it in the recreation area, in the beach, train along with soon. If you did not include much space to bring the actual printed book, you can buy often the e-book. It is make you much easier to read it. You can save the actual book in your smart phone. Thus there are a lot of benefits that you will get when you buy this book.

Pearl Minjares:

Is it anyone who having spare time in that case spend it whole day by simply watching television programs or just laying on the bed? Do you need something totally new? This Google's Very Public IPO can be the reply, oh how comes? A fresh book you know. You are therefore out of date, spending your extra time by reading in this brand-new era is common not a geek activity. So what these books have than the others?
