Interpretive Phenomenology: Embodiment, Caring, and Ethics in Health and Illness (Artificial Intelligence and Society)

Interpretive Phenomenology: Embodiment, Caring, and Ethics in Health and Illness (Artificial Intelligence and Society)

Patricia Benner's introduction to phenomenology develops the reader's understanding of the strategies and processes involved in this innovative approach to nursing.

The author discusses the relationship between theory and practice, considers the possibility of a science of caring from a feminist perspective, introduces interpretive phenomenology to the study of natural groups such as families, and suggests a basis for developing nursing ethics that is true to the caring and healing practices of the nursing profession.
