The Illustrated Network: How TCP/IP Works in a Modern Network (The Morgan Kaufmann Series in Networking) Walter Goralski

In 1994, W. Richard Stevens and Addison-Wesley published a networking classic: TCP/IP Illustrated. The model for that book was a brilliant, unfettered approach to networking concepts that has proven itself over time to be popular with readers of beginning to intermediate networking knowledge. The Illustrated Network takes this time-honored approach and modernizes it by creating not only a much larger and more complicated network, but also by incorporating all the networking advancements that have taken place since the mid-1990s, which are many.

This book takes the popular Stevens approach and modernizes it, employing 2008 equipment, operating systems, and router vendors. It presents an 'illustrated' explanation of how TCP/IP works with consistent examples from a real, working network configuration that includes servers, routers, and workstations. Diagnostic traces allow the reader to follow the discussion with unprecedented clarity and precision. True to the title of the book, there are 330+ diagrams and screen shots, as well as topology diagrams and a unique repeating chapter opening diagram. Illustrations are also used as end-of-chapter questions. A complete and modern network was assembled to write this book, with all the material coming from real objects connected and running on the network, not assumptions. Presents a real world networking scenario the way the reader sees them in a device-agnostic world. Doesn't preach one platform or the other.

Here are ten key differences between the two:

Stevens Goralski's

Older operating systems (AIX,svr4,etc.) Newer OSs (XP, Linux, FreeBSD, etc.)

Two routers (Cisco, Telebit (obsolete)) Two routers (M-series, J-series)

Slow Ethernet and SLIP link Fast Ethernet, Gigabit Ethernet, and SONET/SDH links (modern)

Tcpdump for traces Newer, better utility to capture traces (Ethereal, now has a new name!)

No IPSec IPSec

No multicast Multicast

No router security discussed Firewall routers detailed

No Web Full Web browser HTML consideration

No IPv6 IPv6 overview

Few configuration details More configuration details (ie, SSH, SSL, MPLS, ATM/FR consideration, wireless LANS, OSPF and BGP routing protocols)

- New Modern Approach to Popular Topic Adopts the popular Stevens approach and modernizes it, giving the reader insights into the most up-to-date network equipment, operating systems, and router vendors.
- Shows and Tells Presents an illustrated explanation of how TCP/IP works with consistent examples from a real, working network configuration that includes servers, routers, and workstations, allowing the reader to follow the discussion with unprecedented clarity and precision.
- Over 330 Illustrations True to the title, there are 330 diagrams, screen shots, topology diagrams, and a unique repeating chapter opening diagram to reinforce concepts
- Based on Actual Networks A complete and modern network was assembled to write this book, with all the material coming from real objects connected and running on the network, bringing the real world, not

theory, into sharp focus.

From reader reviews:

Charles Lemaster:

Book is definitely written, printed, or descriptive for everything. You can realize everything you want by a guide. Book has a different type. To be sure that book is important factor to bring us around the world. Adjacent to that you can your reading proficiency was fluently. A e-book The Illustrated Network: How TCP/IP Works in a Modern Network (The Morgan Kaufmann Series in Networking) will make you to end up being smarter. You can feel far more confidence if you can know about every little thing. But some of you think that will open or reading the book make you bored. It is far from make you fun. Why they might be thought like that? Have you looking for best book or acceptable book with you?

Laveta Blodgett:

Spent a free time for you to be fun activity to do! A lot of people spent their leisure time with their family, or their friends. Usually they carrying out activity like watching television, going to beach, or picnic inside park. They actually doing same every week. Do you feel it? Would you like to something different to fill your current free time/ holiday? Could be reading a book is usually option to fill your no cost time/ holiday. The first thing you ask may be what kinds of guide that you should read. If you want to consider look for book, may be the publication untitled The Illustrated Network: How TCP/IP Works in a Modern Network (The Morgan Kaufmann Series in Networking) can be great book to read. May be it may be best activity to you.

Dora Dickey:

People live in this new day of lifestyle always make an effort to and must have the extra time or they will get lots of stress from both way of life and work. So , when we ask do people have free time, we will say absolutely sure. People is human not just a robot. Then we ask again, what kind of activity are you experiencing when the spare time coming to anyone of course your answer will certainly unlimited right. Then do you try this one, reading ebooks. It can be your alternative within spending your spare time, the actual book you have read will be The Illustrated Network: How TCP/IP Works in a Modern Network (The Morgan Kaufmann Series in Networking).

Beatrice Kennemer:

Don't be worry if you are afraid that this book will certainly filled the space in your house, you could have it in e-book approach, more simple and reachable. This kind of The Illustrated Network: How TCP/IP Works in a Modern Network (The Morgan Kaufmann Series in Networking) can give you a lot of buddies because by you looking at this one book you have factor that they don't and make you more like an interesting person. This particular book can be one of a step for you to get success. This guide offer you information that possibly your friend doesn't realize, by knowing more than different make you to be great individuals. So , why hesitate? Let's have The Illustrated Network: How TCP/IP Works in a Modern Network (The Morgan

Kaufmann Series in Networking).
