## Stars in World Cinema: Screen Icons and Star Systems Across Cultures (Tauris World Cinema)

Deflecting the attention from Hollywood, Stars in World Cinema fills an important gap in the study of film by bringing together Star Studies and World Cinema. A team of international scholars here bring their expertise and in-depth knowledge of world cultures and cinema to the study of stars and stardom from six continents, exploring their cultures, their local history and their global relevance. Chapters look at the role of acting, music, singing, painting and martial arts in the making of stars from Australia's indigenous population, Austria, China, Egypt, France, Germany, Greece, India, Iran, Japan, North and South Korea, Nigeria, the Philippines, the former Soviet Union, Spain, North and South America.

Since the very beginnings of cinema, actors and stars have been central to its history and have been one of the medium's defining characteristics. They have also been fundamental to the marketing of cinema and have played a major part in the reception of films in many cultures. Stars in World Cinema examines stardom and the circulation of stars across borders, analysing how local star systems or non-systems construct stardom around the world. Contributors put into practice their local knowledge of history, language and cultural systems, to consider issues of hybridity, boundary crossing, the mobility of stardom, and embodied spectatorship, in order to further the understanding of stars in light of recent interest in reception theory.

Rooted in a multidisciplinary and polycentric approach, this book throws light on unexpected connections between stars and stardoms from different parts of the world, cutting across chronology, geographies and film history.
